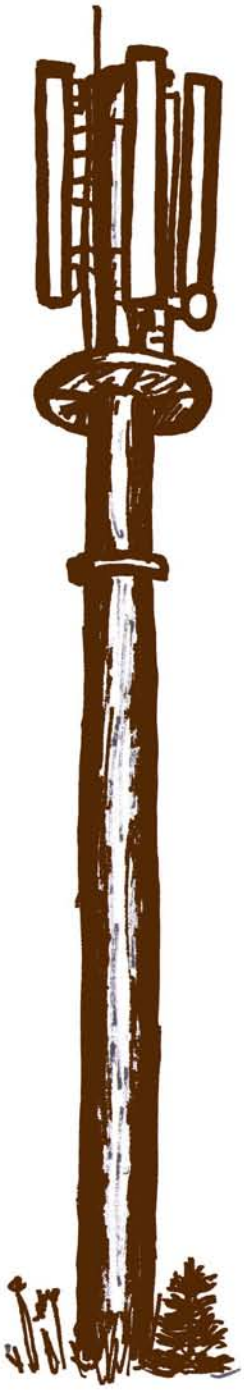
Full Signal: The Hidden Cost of Cell Phones

a free screening and info session

"the electrifying truth." "revealing, riveting"



Monday, June 16 at 6:30 pm
Mocha Mayas Coffee House
47 Bridge Street, Shelburne Falls

Filmed in ten countries, Full Signal is a multi-award winning documentary featuring leading scientists who have devoted their careers to studying the biological effects of wireless communication. It also looks at the lawmakers, activists and lawyers fighting to regulate antenna placement. The screening is safe to attend for people suffering from electro-hypersensitivity and will be followed by an info session including simple precautions people can take to protect themselves from electrosmog, the effects of wireless communication and cell towers on children and wildlife, and a preview of what life might be like in a future without land lines envisioned by AT&T and Verizon in conjunction with the "smart" (ie, two-way radiation emitting) electric meter order issued to all MA utilities companies on June 12th by the Massachusetts Department of Public Utilities.

INVITE YOUR TOWN OFFICIALS!!

"the world's largest biological experiment ever."
- Neurologist Professor Leif Sanford
